

Seminar for ArrayAssist® Enterprise

Wednesday, March 21st 1:00pm – 3:00 pm

Bionomics Research and Technology Center, EOHSI Building

Introduction to ArrayAssist® Enterprise

This seminar will introduce Stratagene's next generation server solution for microarray data. ArrayAssist Enterprise acts as a central storage repository for microarray data and annotation and can be accessed directly through ArrayAssist.

Data Analysis using ArrayAssist®

A demonstration of analysis using ArrayAssist will be given for expression, exon, and copy number microarray data. ArrayAssist is an easy-to-use desktop software that enables researchers to quickly and effectively analyze virtually any type of microarray data.

Location:

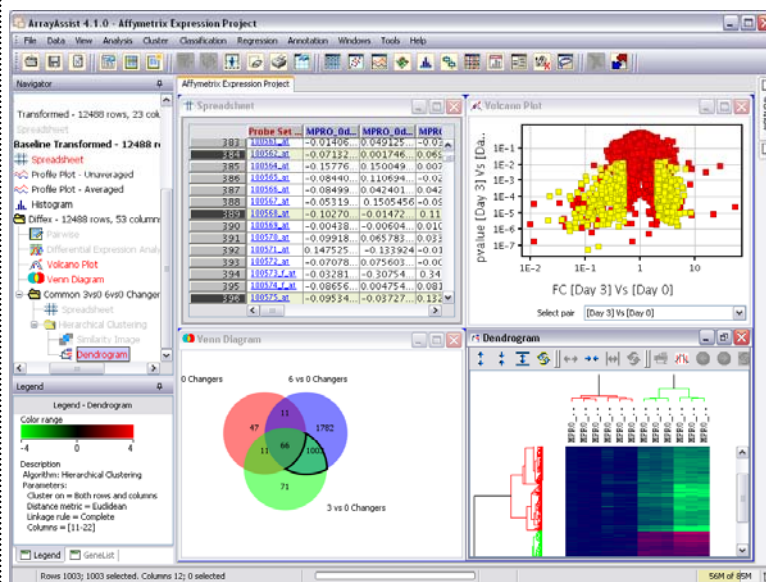

Rutgers University
EOHSI Building, Room C
170 Frelinghuysen Road
Piscataway, NJ

Date and Time:

Thursday, March 21st
1:00 pm – 3:00 pm

ArrayAssist® Enterprise Server replaces GeneTraffic!

Next generation server solution designed to store, organize, and share microarray projects. Features flexible user permissions, comprehensive array and project annotations, and complete project versioning control. Users can log into the Enterprise Server directly from ArrayAssist to pull down or post new entire projects or new analyses for an existing project.

ArrayAssist® is now available for download at:
www.Stratagene.com/SoftwareSolutions

Registration is FREE but REQUIRED
Lunch will be served 12:15 -1:00 PM
